Barkceper Says He Saw Man With Handkerchief Over Face Leaving Alley.

Indianapolis, ind., October 26.—That a man holding a handkerchief to his face, as if to hide his features, was seen to emerge from an alley in the rear of the apartment house in which Dr. Helene Knabe lived alone at 2 o'clock last Tuesday morning, about the hour at which the physician met her death by a knife blow, was the newest lead that had developed to-day in the police investigation.

This information was supplied by J. C. Carr, a barkeeper, who said that as he was going home and turned into the street at the side of Dr. Knabe's apartment, he heard two faint screams, and as he approached the aliey at the rear of the building a man with a handkerchief at his face came out, passed him and hurriedly disappeared around a street corner.

The man, Carr said, was about forty years old, as well as he could judge, and was well dressed. Detectives pointed out that if he was the murderer of Dr. Knabe, he must have made exit from her fiat by its only door into the front corridor of the building, run into a passageway at its side, and then corridor of the building, run into a passageway at its side, and then corridor of the building, run into a passageway at its side, and then corridor of the building, run into a passageway at its side, and then corridor of the building, run into a passageway at its side, and then corridor of the building, run into a passageway at its side, and then corridor of the building, run into a passageway at its side, and then corridor of the building, run into a passageway at its side, and then corridor of the building, run into a passageway at its side, and then corridor of the building, run one had crawled through a window of the fiat.

Some Interesting Facts Regarding Health Statistics

Few people realize to what extent their health depends upon the condition of the kidneys. The physician in nearly all cases of seri-

The physician in nearly all cases of serious illness makes a chemical analysis of the patient's urine. He knows that unless the kidneys are doing their work properly the other organs cannot be brought back to health and strength. When the kidneys are neglected or abused in any way serious results are sure to follow. According to health statistics, Bright's disease, which is really an advanced form of kidney trouble, caused nearly ten thousand deaths in 1910 in the State of New York alone. Therefore, it behooves us to pay more attention to the health of these most important organs. An ideal herbal compound that has had remarkable success as a kidney remedy is Dr. Kilmer's Swamp-Root, the great Kidney, Liver and Bladder Remedy.
